**From Development to Dictatorship**-Thomas C. Field 2014-05-08 During the most idealistic years of John F. Kennedy's Alliance for Progress development program, Bolivia was the highest per capita recipient of U.S. foreign aid in Latin

America. Nonetheless, Washington's modernization programs in early 1960s Bolivia ended up on a collision course with important sectors of the country's civil society, including radical workers, rebellious students, and a plethora of rightwing and leftwing political parties. In *From Development to Dictatorship*, Thomas C. Field Jr. reconstructs the untold story of USAID's first years in Bolivia, including the

country's 1964 military coup d'état. Field draws heavily on local sources to demonstrate that Bolivia's turn toward anticommunist, development-oriented dictatorship was the logical and practical culmination of the military-led modernization paradigm that provided the liberal underpinnings of Kennedy's Alliance for Progress. In the process, the book explores several underappreciated aspects of Cold War liberal internationalism: the tendency of "development" to encourage authoritarian solutions to political unrest, the connection between modernization theories and the rise of Third World armed forces, and the intimacy between USAID and CIA covert operations. At the same time, the book challenges the conventional dichotomy between ideology and strategy in international politics, and it engages with a growing literature on development as a key rubric for understanding the interconnected processes of decolonization and the Cold War.

This all-new primer on owning and flying the Cessna 210 Centurion is dedicated to helping all who own or want to fly a Cessna 210 master the art of piloting this complex airplane. Author Chuck McGill covers the wide gamut of 210 models,

accessories, and modifications, offering his wisdom on optimum performance and safe operations based on his thousands of hours of flying and teaching in the airplane. Flying the Cessna 210 contains 114 full-color photographs and illustrations in 196 pages, as well as abundant facts, tips, and techniques to help anyone command the Centurion for the best performance and safety. So often, people purchase complex go-fast airplanes but don't have a good understanding of the airplane's systems and flight characteristics. McGill has written this book to extend pilots' knowledge far beyond a POH and to help them get optimum performance, safety, and longevity from their airplanes. While offering some background on the C210, T210, and P210, the book is much less about history and mechanics, focusing instead on systems and operations. Its 11 chapters and extensive Appendix offer insight into common operational issues during preflight, taxi, takeoff, climb, cruise, descent, and landing operations unique to each model of the 210. Additionally, it goes a long way to help pilots of airplanes with

STC'd mods, accessories, and new avionics understand how those enhancements can be best used to make the most of safe flight operations. The book also highlights the versatility and utility of this multi-talented aircraft.

### **Men in Green-Michael Bamberger 2015-04-07**

The instant New York Times bestseller from acclaimed Sports Illustrated writer Michael Bamberger—a warm, nostalgic, intimately reported account of golf's greatest generation,

and “maybe the best golf book I’ve ever read” (Bill Reynolds, The Providence Journal). With “exceptional insight into some of America’s greatest players over the last half-century” (The Philadelphia Inquirer), *Men in Green* is to golf what Roger Kahn’s *The Boys of Summer* was to baseball: a big-hearted account of the sport’s greats, from the household names to the private legends, those behind-the-curtain giants who never made the headlines. Michael Bamberger, who has covered the game for twenty years at *Sports Illustrated*, shows us the big names as we’ve never seen them before: Arnold Palmer, Jack Nicklaus, Tom Watson, Curtis Strange, Fred Couples—and the late Ken Venturi. But he also chronicles the legendary figures known only to insiders, who nevertheless have left an indelible mark on the sport. There’s a club pro, a teaching pro, an old black Southern caddie. There’s a tournament director in his seventies, a TV director in his eighties, and a USGA executive in his nineties. All these figures, from the marquee names to the unknowns, have changed the game. What they all share is a game that courses

through their collective veins like a drug. Was golf better back in the day? *Men in Green* weaves a history of the modern game that is personal, touching, inviting, and new. This meditation on aging and a celebration of the game is “a nostalgic visit and reminiscence with those who fashioned golf history...and should be cherished” (*Golf Digest*).

**Me and the Sky**-Beverley Bass 2019-09-10 The groundbreaking female pilot featured in the hit Broadway musical *Come from Away* tells her story in this high-flying and inspiring picture-book autobiography! When Beverley Bass was a young girl in the late 1950s, she told her parents she wanted to fly planes--and they told her that girls couldn't be pilots. Still, they encouraged her, and brought her to a nearby airport to watch the planes take off and land. After decades of refusing to take no for an answer, in 1986 Beverley became the first female pilot promoted to captain by American Airlines and led the first all-female crewed flight shortly thereafter. Her

revolutionary career became even more newsworthy when she was forced to land in the remote town of Gander, Newfoundland, on September 11, 2001, due to US airspace closures. After several days there, she flew her crew and passengers safely home. Beverley's incredible life is now immortalized in the hit Broadway musical *Come from Away*. Here, discover how she went from an ambitious young girl gazing up at the sky to a groundbreaking pilot smiling down from the cockpit.
