A Window Across the River-Brian Morton 2004-09-07 A writer is caught between her calling and the man she loves in this “joyous, funny and bittersweet” novel (Newsday). Isaac and Nora haven’t seen each other in five years, yet when Nora phones Isaac late one night, he knows who it is before she’s spoken a word. Isaac, a photographer, is relinquishing his artistic career, while Nora, a writer, is seeking to rededicate herself to hers. Fueled by their rediscovered love, Nora is soon on fire with the best work she’s ever done, until she realizes that the story she’s writing has turned into a fictionalized portrait of Isaac, exposing his frailties and compromises and sure to be viewed by him as a betrayal. How do we remain faithful to our calling if it estranges us from the people we love? How do we remain in love after we have seen the very worst of our loved ones? These are some of the questions explored in a novel that critics are calling “an absolute pleasure” (The Seattle Times). From the author of Florence Gordon and Starting Out in the Evening, this is a “novel of two star-crossed but self-absorbed artists facing crises of the heart and conscience. . . . An intriguing look at the nature of love and the need for acceptance” (Booklist). “I loved this book.” —Alice Sebold

In Search of the Rose Notes-Emily Arsenault 2011-07-26 “A very clever wordsmith.” —New York Times Book Review “When Emily Arsenault was growing up, a teacher told the fifth-grader she was very good at writing. Give that teacher an A.” —Hartford Courant Emily Arsenault’s compelling debut, Broken Teaglass, was resoundingly praised (“Quirky and inventive...meets all the definitions of a good read.”—Richmond Times-Dispatch). With her intelligent, complex, and ingeniously crafted sophomore offering, In Search of the Rose Notes, Arsenault validates her standing as an exhilarating new voice in contemporary fiction. A moody and engrossing mystery, In Search of the Rose Notes follows two best friends from childhood who once unsuccessfully investigated the disappearance of their teenage babysitter, and now, in their twenties, attempt once again to uncover the truth. Readers who love the literary, female focused mysteries of Laura Lippman, Tana French, and Jennifer McMahon will be thrilled to add Emily Arsenault to their must-read lists.

Raumanen-Marianne Katoppo 2018-12 Raumanen, a prize-winning novel by Marianne Katoppo, tells the story of Monang, a handsome but wayward Batak man, and Raumanen, a young Minahasa woman who, though educated and intelligent, is also a 'soft touch' when it comes to love. As is deftly revealed by the author in this novel, even in modern day Indonesia, matters of religion and ethnicity can greatly affect--for better or worse--the course of a couple's relationship.

Language, Culture, and Education-Elizabeth Ijalba 2019-03-31 Exploring language, culture and education among immigrants in the United States, this volume discusses the range of experiences in raising children with more than one language in major ethno-linguistic groups in New York. Research and practice from the fields of speech-language pathology, bilingual education, and public health in immigrant families are brought together to provide guidance for speech-language pathologists in differentiating language disorders from language variation, and for parents on how to raise their children with more than one language. Commonalities among dissimilar groups, such as Chinese, Korean, and Hispanic immigrants are analyzed, as well as the language needs of Arab-Americans, the home literacy practices of immigrant parents who speak Mixteco and Spanish, and the crucial role of teachers in bridging immigrants' classroom and home contexts. These studies shed new light on much-needed policy reforms to improve the involvement of culturally and linguistically diverse families in decisions affecting their children's education.

Friedman 2007-07-24 This Independence Day edition of The World is Flat 3.0 includes an an exclusive preview of That Used to Be Us: How America Fell Behind in the World It Invented and How We Can Come Back, by Thomas L. Friedman and Michael Mandelbaum, on sale September 5th, 2011. A New Edition of the Phenomenal #1 Bestseller “One mark of a great book is that it makes you see things in a new way, and Mr. Friedman certainly succeeds in that goal,” the Nobel laureate Joseph E. Stiglitz wrote in The New York Times reviewing The World Is Flat in 2005. In this new edition, Thomas L. Friedman includes fresh stories and insights to help us understand the flattening of the world. Weaving new information into his overall thesis, and answering the questions he has been most frequently asked by parents across the country, this third edition also includes two new chapters--on how to be a political activist and social entrepreneur in a flat world; and on the more troubling question of how to manage our reputations and privacy in a world where we are all becoming publishers and public figures. The World Is Flat 3.0 is an essential update on globalization, its opportunities for individual empowerment, its achievements at lifting millions out of poverty, and its drawbacks--environmental, social, and political, powerfully illuminated by the Pulitzer Prize--winning author of The Lexus and the Olive Tree.

Passive Acoustic Monitoring of Cetaceans-Walter M. X. Zimmer 2011-04-21 Passive acoustic monitoring is increasingly used by the scientific community to study, survey and census marine mammals, especially cetaceans, many of which are easier to hear than to see. PAM is also used to support efforts to mitigate potential negative effects of human activities such as ship traffic, military and civilian sonar and offshore exploration. Walter Zimmer provides an integrated approach to PAM, combining physical principles, discussion of technical tools and application-oriented concepts of operations. Additionally, relevant information and tools necessary to assess existing and future PAM systems are presented, with Matlab code used to generate figures and results so readers can reproduce data and modify code to analyse the impact of changes. This allows the principles to be studied whilst discovering potential difficulties and side effects. Aimed at graduate students and researchers, the book provides all information and tools necessary to gain a comprehensive understanding of this interdisciplinary subject.

Dark Pool of Light, Volume Two-Richard Grossinger 2012-08-28 In books like Embyogenesis and Embryos, Galaxies, and Sentient Beings, author Richard Grossinger brought together the subjects of biological embryology and the esoteric process of human consciousness becoming embodied (“The embryo is the universe writing itself on its own body”). In Dark Pool of Light, his three-volume series of books discussing the nature of reality and consciousness, Grossinger weaves neuroscience-based behaviorism and the phenomenology of “being” and reality together with psychological and psychospiritual views of “that single thing which is most difficult to understand or vindicate: our own existence.” In Volume 1, Grossinger begins with the scientific and philosophical, analytical views of reality; the subtitle of that volume is The Neuroscience, Evolution, and Ontology of Consciousness. In Volume 2, Consciousness in Psychospiritual and Psychic Ranges, he examines psychic sensitivity and planes of existence from diverse experiential perspectives, including theosophy and Buddhism. In 2008, Grossinger began studying with noted psychic teacher John Friedlander, who helped him refine his vision of cerebral and somatic awareness to still-subtler levels. “Dark Pool of Light began unnamed in the journals of my psychic work with John Friedlander,” says Grossinger, “not so much a record of actual practices as insights from them and extensions out of them.” An expansive inquiry into the nature of consciousness, this volume includes these “field notes” and observations from Grossinger’s studies in the imaginal psychic realm, as well as exercises to invite the reader to experience these dimensions for themselves.

Asia’s Maritime Bead Trade-Peter Francis 2002-01-01 This fascinating study is the first detailed description of the ancient and enduring trade in beads that spans more than two millennia and once stretched from the Middle East to East Asia and affected areas as far apart as West Africa and the American Pacific coast. Beads are universal and among the earliest art forms. Made of glass, semiprecious stone, or precious organic materials such as amber and coral, they were ubiquitous in the ancient world, serving as decorations, magical charms, mnemonic and counting devices, symbols of wealth and status. Much of the ancient bead trade was incorporated in Asian maritime commerce, and many of the beads involved have Asian origins. Peter Francis, Jr., a pioneer in bead studies, incorporates firsthand knowledge of beads and beadmaking in the field with years of solid, scholarly research, effectively eliminating much of the hearsay and speculation that so often characterizes works on beads. In addition to the production, use, and provenance of beads, he examines the importance of the bead trade for the economies of the countries involved and provides insights into the lives of its many participants: artisans, mariners, and merchants. He covers the widely-dispersed Indo-Pacific beads (sometimes called Trade Wind beads or mutisalah), Chinese glass beads, Middle Eastern glass beads, Indian stone beads, heirloom beads in Southeast Asia and Micronesia, and other minor beads and bead industries involved in the trade.

Follow me, Jonny Rowe, on a wild goose-chase from Ireland to the USA with my American grandfather's remains in my red birthday balloon. Feeling responsible for 45's death, and as a thank-you for filling Clinical Dad's void after leaving that questionable suicide note, I make it my quest to return 45 to his birthplace amongst the corn of Iowa, USA, suspended inside his soul-bubble.
