Motorized Obsessions-Paul R. Josephson 2007-08-22 From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and

rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

If Minds Had Toes-Lucy Eyre 2008-12-13 Fifteen-year-old Ben Warner is dizzy with boredom working at his local fish and chips shop. One evening, a young woman saunters in and, between mouthfuls of chips, invites him to visit her in the World of Ideas. Ben is excited, but suspicious. The World of Ideas

is the philosopher's quarter of the afterlife, and adorable Lila has been residing there for thirty years, but being dead is just the start of her problems. Lila's boss, Socrates, President of the World of Ideas for the last 2,109 years, has made a bet with his rival, Wittgenstein, that philosophy can improve your life. If Socrates loses he cedes the presidency to his crabby nemesis. For the wager, they choose Ben as their unwitting guinea pig, and Lila's mission is to prove to him that his life-annoying sisters, adolescent blues, smarmy boss and all-can be changed fundamentally for the better through philosophy. So begins a mind-bending guided tour through the big questions in life. When is orange not orange? Do we have free will? Does time speed up when your heart beats faster? Charming and full of wit and humor, Lucy Eyre's *If Minds Had Toes* warmly shows that few other questions-how we live and whether our lives have meaning-are more important.

The Earth Moved-Amy Stewart 2005-03-11 In *The Earth Moved*, Amy Stewart takes us on a journey through the underground world and introduces us to one of its most amazing denizens. The earthworm may be small, spineless, and blind, but its impact on the ecosystem is profound. It ploughs the soil, fights plant diseases, cleans up pollution, and turns ordinary dirt into fertile land. Who knew? In her witty, offbeat style, Stewart shows that much depends on the actions of the lowly worm. Charles Darwin devoted his last years to the meticulous study of these creatures, praising their remarkable abilities. With the august scientist as her inspiration, Stewart investigates the worm's subterranean realm, talks to

oligochaetologists—the unsung heroes of earthworm science—who have devoted their lives to unearthing the complex life beneath our feet, and observes the thousands of worms in her own garden. From the legendary giant Australian worm that stretches to ten feet in length to the modest nightcrawler that wormed its way into the heart of Darwin's last book to the energetic red wigglers in Stewart's compost bin, *The Earth Moved* gives worms their due and exposes their hidden and extraordinary universe. This book is for all of us who appreciate Mother Nature's creatures, no matter how humble.

African Economic

Development-Christopher Cramer 2020-06-11 This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Unevenness and inequalities form a central fact of African economic

experiences. This book challenges conventional wisdoms about economic performance and possible policies for economic development in African countries, using the striking variation in economic performance as a starting point. *African Economic Development: Evidence, Theory, and Policy* highlights not only difference between countries, but also variation within countries. It focuses on issues relating to gender, class, and ethnic identity, such as neo-natal mortality, school dropout, and horticultural and agribusiness exports. Variations in these areas point to opportunities for changing performance, reducing reducing inequalities, learning from other policy experiences, and escaping the ties of structure and the legacies of a colonial past. *African Economic Development* rejects teleological illusions and Eurocentric prejudice, criticizing a range of orthodox and heterodox economists for their cavalier attitude to evidence. Instead, it shows that seeing the contradictions of capitalism for what they

are - fundamental and enduring - may help policy officials protect themselves against the misleading idea that development can be expected to be a smooth, linear process, or that it would be if certain impediments were removed. Drawing on decades of research and policy experience, this book combines careful use of available evidence from a range of African countries with economic insights to make the policy case for specific types of public sector investment.

Defending Constantine-

Peter J. Leithart 2010-09-24
Peter Leithart weighs what we've been taught about Constantine and claims that in focusing on these historical mirages we have failed to notice the true significance of Constantine and Rome baptized. He reveals how beneath the surface of this contested story there lies a deeper narrative--a tectonic shift in the political theology of an empire--with far-reaching implications.

Buena Vista Park, the secret home of Titania, Oberon, and their court. On this night, something awful is happening in the faerie kingdom: in a fit of sadness over the end of her marriage, which broke up in the wake of the death of her adopted son, Titania has set loose an ancient menace, and the chaos that ensues will threaten the lives of immortals and mortals alike. Selected by The New Yorker as one the best young writers in America, Adrian has created a singularly playful, heartbreaking, and humorous novel—a story that charts the borders between reality and dreams, love and magic, and mortality and immortality.

It's bad enough that his people, the Elfies of Reign, triggered a curse which reduced the entire inhabitants to a mere inch centuries ago. All because of one Keeper who failed his purpose. Even the King's Books, penned with the Majesty's own blood, did not help ward off this anathema. Now, Gehzurole, the evil lord, and his armies of Scorpents, seem bent on destroying Jules and his family. Why? Gehzurole's agents hunt for Jules as he journeys into enemy land to find the truth. Truth that could save him and his family, and possibly even reverse the age-long curse. Provided Jules doesn't get himself killed first.

which theological considerations have figured in natural law theorizing, from Plato to Spinoza. Theological considerations have long had a pronounced role in Catholic natural law theories, but have not been seriously examined from a wider perspective. The contributors to this volume take a more inclusive view of the relation between conceptions of natural law and theistic claims and principles. They do not jointly defend one particular thematic claim, but articulate diverse ways in which natural law has both been understood and related to theistic claims. In addition to exploring Plato and the Stoics, the volume also looks at medieval Jewish thought, the thought of Aquinas, Scotus, and Ockham, and the ways in which Spinoza's thought includes resonances of earlier views and intimations of later developments. Taken as a whole, these essays enlarge the scope of the discussion of natural law through study of how the naturalness of natural law has often been related to theses about the divine. The latter are often crucial elements of natural

law theorizing, having an integral role in accounting for the metaethical status and ethical bindingness of natural law. At the same time, the question of the relation between natural law and God — and the relation between natural law and divine command — has been addressed in a multiplicity of ways by key figures throughout the history of natural law theorizing, and these essays accord them the explanatory significance they deserve.

The Struggle For Nature-

Jozet Keulartz 2003-05-20 The
Struggle for Nature outlines
and examines the main
aspects of current
environmental philosophy
including deep ecology, social
and political ecology, eco-
feminism and eco-anarchism.
It criticises the dependency
on science of these
philosophies and the social
problems engendered by
them. The author argues for a
post-naturalistic turn in
environmental philosophy.
The Struggle for Nature
presents the most up-to-date
arguments in environmental
philosophy, which will be
valuable reading for students
of applied philosophy,
