Race Tech's Motorcycle Suspension Bible

Paul Thede 2010-06-19 Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you

gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Strategy in Asia-Thomas G. Mahnken
2014-10-15 Some of the United States' greatest challenges over the coming decades are likely to emanate from the Asia-Pacific region. China and India are rising and Militant Islam continues to take root in Pakistan, while nuclear proliferation threatens to continue in fits and starts. If America is to meet these challenges comprehensively, strategists will have to learn more about Asia, and Asian scholars, policymakers, and analysts will need to understand better the enduring and timeless principles of strategy. Based on the premise therefore that the increasing strategic weight of the Asia-Pacific region warrants greater attention from both scholars and practitioners alike, *Strategy in Asia: The Past, Present, and Future of Regional Security* aims to marry the fields of strategic studies and Asian studies in order to help academics and practitioners to begin addressing these challenges. The book uses the lenses of geography, culture, and economics to examine in depth the strategic context that Asia presents to the major nations of the region—including the U.S. as a Pacific nation—and the strategic scenarios that may well play out in the region in the near future. Specific attention is paid to Asia as a warfighting environment, and to the warfighting traditions and current postures of the major nations.

Riding in the Zone-Ken Condon 2019-10-15
Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.
