**Trout Bum**-John Gierach 2013-09-01 Trout Bum is a fresh, contemporary look at fly fishing, and the way of life that grows out of a passion for it. The people, the places, and the accoutrements that surround the sport make a fishing trip more than a set of tactics and techniques. John Gierach, a serious fisherman with a wry sense of humor, show us just how much more with his fishing stories and a unique look at the fly-fishing lifestyle. Trout Bum is really about why people fish as much as it is about how they fish, and it is ultimately about enduring values and about living in a harmony with our environment. Few books have had the impact on an entire generation that Trout Bum has had on the fly-fishing world. The wit, warmth, and the easy familiarity that John Gierach brings to us in Trout Bum is as fresh and engaging now as when it was first published twenty-five years ago. There's no telling how many anglers have quit their jobs and headed west after reading the first edition of this classic collection of fly-fishing essays.

**Matching Theory**-László Lovász 2009 This book surveys matching theory, with an emphasis on connections with other areas of mathematics and on the role matching theory has played, and continues to play, in the development of some of these areas. Besides basic results on the existence of matchings and on the matching structure of graphs, the impact of matching theory is discussed by providing crucial special cases and nontrivial examples on matroid theory, algorithms, and polyhedral combinatorics. The new Appendix outlines how the theory and applications of matching theory have continued to develop since the book was first published in 1986, by launching (among other things) the Markov Chain Monte Carlo method.

**The Man Who Would Stop at Nothing: Long-Distance Motorcycling's Endless Road**-Melissa Holbrook Pierson 2011-10-03 "Pierson is an even better writer than she is a rider."—Boston Globe "World's Toughest Motorcycle Riders"—long-distance motorcycling is not a pastime but an obsession. In this candid, eloquent, sharply observed book, Melissa Holbrook Pierson introduces us to this strange endeavor and the men and women who live to ride impossibly long distances, eating up road, almost without cease. And who find it nothing but fun. Perhaps the most determined of them is John Ryan, a magnetic, enigmatic man who loves nothing better than breaking records of amazing distance—at no small risk to himself and his health. But why? Pierson, who rediscovered the joys of motorcycling in the midst of a personal crisis, puts on her helmet and joins Ryan in his element in order to understand his singular desire and discipline, his passion and his obsession. The Man Who Would Stop at Nothing offers an intimate glimpse of an unusually independent yet supportive community as well as a revealing, unforgettable portrait of its most daring member. In electric, pitch-perfect prose, Pierson gives us rare insights into not only a subculture but also the deeply human craving for

something more that drives it.

**Liberator: the Harley-Davidson WLA in the Second World War**-Robert Kim 2015-02-04 The Harley-Davidson WLA and other American military motorcycles performed crucial roles during the Second World War in the U.S. armed forces and other Allied armies worldwide. *Liberator: The Harley-Davidson WLA in the Second World War* for the first time tells the full story of how the U.S. Army and Marine Corps and other Allied armed forces used the Harley-Davidson WLA and other American military motorcycles during the war. The book traces the development of the WLA in 1940-42 from the civilian Forty-Five models of 1929-39, describes the evolution of U.S. Army and Marine Corps usage of motorcycles through the motorcycle-borne mechanized cavalry experiments of 1940-41, and addresses wartime use of motorcycles in each major type of U.S. Army unit (mechanized cavalry, armored divisions, infantry divisions, airborne divisions, military police, etc.) and in Marine Divisions, with detailed tables of organization and equipment for each. Moreover, *Liberator: The Harley-Davidson WLA in the Second World War* describes the use of the WLA, Indians, and other Harley-Davidsons in each Allied army that used them. It especially emphasizes their use by the Soviet Union, which was the largest user of the WLA, receiving more through Lend-Lease than the number used by the U.S. armed services. These countries include:- Soviet Union- Canada- United Kingdom- Australia- New Zealand- South Africa- India- Poland - France - Brazil- Iran- Republic of China Although primarily focused on the Harley-Davidson WLA, the book also describes use of other Harley-Davidsons, Indians, and small motorcycles designed for airborne troops, in the U.S. armed services and other allied armies. These other models include:- Harley-Davidson WL- Harley-Davidson "Big Twins"- Indian 741, 640, 344, and 340- Cushman Model 53 scooter - Simplex Servicycle Unique human perspectives on the Harley-Davidson WLA and other American military motorcycles during the war come from the stories of several individual U.S. Army soldiers who fought on motorcycles, and the histories of a U.S. Army military police unit and a Red Army motorcycle battalion. These stories, several of them previously unpublished, are reminders of the men who once rode these machines during the war. This book will be of interest to enthusiasts of Harley-Davidson, Indian, and military motorcycles, and to military historians and preservationists worldwide.

**Motorcycle Therapy**-Jeremy Kroeker 2012-05-01 Jeremy Kroeker has travelled to nearly 30 countries with his motorcycle and done at least one outrageously stupid thing in every one. One October he rode from Canada to Panama in an attempt to flee the pain of a broken relationship. *Motorcycle Therapy*-A Canadian Adventure in Central America rumbles with comic adventure as two men, fleeing failed relationships, test the limits of their motorcycles and their friendship. Join the horn-honking, signal-flashing, wheelie-popping pair as they endure painful bee stings, painful snakebites and (when they talk to girls) painful humiliation.

**Classic Speedboats, 1916-1939**-Gérald Guétat 1997 Readers can relive the true golden age of high-performance classic speedboats in this book that covers these mighty wooden-hulled craft from around World War I until just before the second World War. This was an era when speed was still a new plaything, and speedboats and aircraft were raced as passionately as were automobiles; when massive mahogany speedboats powered by engines from suppliers such as Rolls-Royce competed fiercely against rivals from around the world. Classic speedboat enthusiasts will relish the cutaway drawings of these craft, as well as the choice archival photography and the modern color photography of these now-impeccably restored beauties.

**Motorcycle Tuning: Chassis**-John Robinson 1994-04-15 This third edition, in the same tradition as the second, is a vital servicing tool containing information covering virtually every motorcycle over 50cc sold in the UK since 1980. **Landscape as Infrastructure**-Pierre Belanger 2016-11-10 As ecology becomes the new engineering, the projection of landscape as infrastructure—the contemporary alignment of the disciplines of landscape architecture, civil engineering, and urban planning—has become pressing. Predominant challenges facing urban regions and territories today—including shifting climates, material flows, and population mobilities, are addressed and strategized here. Responding to the under-performance of master planning and over-exertion of technological systems at the end of twentieth century, this book argues for the strategic design of "infrastructural ecologies," describing a synthetic landscape of living, biophysical systems that operate as urban infrastructures to shape and direct the future of urban economies and cultures into the 21st century. Pierre Bélanger is Associate Professor of Landscape Architecture and Co-Director of the Master in Design Studies Program at Harvard University's Graduate School of Design. As part of the Department of Landscape Architecture and the Advanced Studies Program, Bélanger teaches and coordinates graduate courses on the convergence of ecology, infrastructure and urbanism in the interrelated fields of design, planning and engineering. Dr. Bélanger is author of the 35th edition of the Pamphlet Architecture Series from Princeton Architectural Press, GOING LIVE: from States to Systems (pa35.net), co-editor with Jennifer Sigler of the 39th issue of Harvard Design Magazine, Wet Matter, and co-author of the forthcoming volume ECOLOGIES OF POWER: Mapping Military Geographies & Logistical Landscapes of the U.S. Department of Defense. As a landscape architect and urbanist, he is the recipient of the 2008 Canada Prix de Rome in Architecture and the Curator for the Canada Pavilion at Canadian Exhibition, "EXTRACTION," at the 2016 Venice Architecture Biennale (extraction.ca).

**Ki-61 and Ki-100 Aces**-Nicholas Millman 2015-11-20 This is the story of the elite Japanese Army Air force (JAAF) aces that flew the Kawasaki Ki-61 Hien (Swallow), and the Ki-100 Goshikisen in the Pacific Theatre of World War 2. The former, codenamed 'Tony' by the allies, was a technically excellent aircraft, possessing power, stability and a good rate of climb - differing radically from the usual Japanese philosophy of building light, ultra-maneuvrable fighters. Its pilots soon realised, however, that the type was plagued by a number of dangerous mechanical issues. Then as the war moved relentlessly closer to Japan's doorstep, a desperate, expedient innovation to the Ki-61 airframe by fitting it with a radial instead of inline engine resulted in one of the finest fighters of World War 2 - the Ki-100. This book uses the latest findings to provide a gripping account of some of the most remarkable and hard-pressed fighter pilots of the war. It reveals how these men, unlike so many of their unfortunate late-war colleagues, could surprise Allied aircraft in high-performance fighters and claim successes in the face of enormous odds.

**Through Dust and Darkness**-Jeremy Kroeker 2013-09-25 Jeremy Kroeker

is a Mennonite with a motorcycle. He doesn't have a funny beard and he's never even driven a buggy, but his family hails from the same Mennonite community that Miriam Toews fictionalized in *A Complicated Kindness*. From childhood through college, Kroeker attended Christian schools where he learned to think critically back to predetermined conclusions. Years later, when his faith begins to unravel, Kroeker stops short of tossing it all aside, choosing instead to leave every unanswered question hanging there on the edge of his mind. He might have gotten away with it, too, except for a drunken resolution that forces the issue of God back into his life. In the fall of 2007, Kroeker decides to ride his motorcycle across Europe and into the theocratic nation of Iran... a nation ruled by God. In the end, Kroeker finds himself on a forbidden visit to the holiest Muslim shrine in all of Iran. Once inside, invisible hands reach into Kroeker's chest and rip from his heart a sincere prayer, his first in many years. And God hears that prayer. For before Kroeker can escape Mashhad, God steals into his hotel room one night to threaten him with death. At least, that's one way to look at it. Throughout the narrative, Kroeker swings from dogmatic belief in God to overwhelming doubt before finally deciding that the key to approaching God is humility. He understands that uncertainty is not only an acceptable state of mind when considering the Divine, but it is necessary. He will always fear God. But who knows? Perhaps if he keeps riding, one of these days God will speak clearly. And that frightens him, too.

**Art of the Bobber**-Spencer Drate 2006 Before choppers, there was the bobber. When American-brand motorcycle owners needed to change their rear tires decades ago, the rear fender featured a hinge near its center that would flip up to make room for the tire to be removed. At some point ,an enterprising rider decided to permanently remove the hinged rear portion of the fender - shortening the fender like the "bobbed" hair cuts popular during those days - or so the theory goes. The tradition of stripping down to a bike's bare essence and celebrating its simpler forms - making a bobber - was begun. As these lean, mean machines come roaring back onto the scene in a big way, this book offers a look at where the bobber came from, where it's going, and what it's about. With over 200 exclusive photographs of the most cutting-edge bobbers, biographies of the men and women who build them, and inside stories on top shops like Indian Larry, Von Dutch Kustoms, Orange County Choppers, Arlen Ness, Mitch Bergeron, and more. This book captures the rebel spirit of the ultimate custom bike as never before. Publisher's Note: This edition includes a poster on the reverse of the book's jacket.
