MG T Series In Detail-Paddy Willmer 2005-08-26 The T Series MGs, starting with the TA introduced in 1936, represents the absolute archetype of the British sports car. These cars provide the authentic experience of sports car driving: the snug two-seater cockpit, quick steering, firm suspension, flat cornering, snappy gearchange and lively engine. Then there are the looks: the long bonnet, swept wings, cutaway doors, slab tank and rear-mounted spare wheel established a unique style. In addition, the T Series MGs opened the door for the British sports car's conquest of the U.S. market.

Trait-Modified Oils in Foods-Frank T. Orthoefer 2015-08-03 In recent years, the food industry has made substantial advances in replacing partially hydrogenated oils, high in trans-fatty acids, in foods. Trait-modified oils were then developed to produce trans-fat free, low saturated functional oils. Trait-modified Oils in Foods offers top line information on the sources, composition, performance, health, taste, and availability of modified next generation oils. Coverage extends to public policy development, discussions of real world transition to healthy oils by food service and food processing

industries and the future of trait-modified oils. The book provides solutions to food companies with the potential of improving the health benefits of foods through eliminating trans-fats and reducing saturated fats from formulations. A landmark resource on modified next-generation, trait-modified oils, this book is essential reading for oil processors, manufacturers and producers, as well as any professional involved in food quality assurance and public health.

Thermal Processing of Foods-K. P. Sandeep 2011-05-12 The food industry has utilized automated control systems for over a quarter of a century. However, the past decade has seen an increase in the use of more sophisticated software-driven, on-line control systems, especially in thermal processing unit operations. As these software-driven control systems have become more complex, the need to validate their operation has become more important. In addition to validating new control systems, some food

companies have undertaken the more difficult task of validating legacy control systems that have been operating for a number of years on retorts or aseptic systems. Thermal Processing: Control and Automation presents an overview of various facets of thermal processing and packaging from industry, academic, and government representatives. The book contains information that will be valuable not only to a person interested in understanding the fundamental aspects of thermal processing (eg graduate students), but also to those involved in designing the processes (eg process specialists based in food manufacturing) and those who are involved in process filing with USDA or FDA. The book focuses on technical aspects, both from a thermal processing standpoint and from an automation and process control standpoint. Coverage includes established technologies such as retorting as well as emerging technologies such as continuous flow microwave processing. The book addresses both the theoretical and applied aspects of thermal processing, concluding with speculations on future trends and directions.

Human Diseases from Wildlife-Michael R. Conover 2014-09-18 Human Diseases from Wildlife presents information on the most prevalent and serious zoonotic diseases in the US and Canada, some of which have been national headline news like anthrax, influenza, and West Nile virus. Diseases that are caused by pathogens with the ability to infect both humans and animals are known as zoonotic diseases, which literally means "disease from animals." The issue of human-wildlife disease interactions is a growing concern as humans continue to interface with wildlife. People who handle wildlife including field workers, wildlife professionals, trappers, and hunters want to know about potential diseases, risks, and how to protect themselves from disease. This book was written because many people are uninformed about zoonotic diseases. This lack of information causes some people to have a heightened fear of zoonotic diseases, preventing them from enjoying wildlife or spending time outdoors. Other people needlessly expose themselves to disease by neglecting simple precautions. This book includes information on bacterial, spirochetal, rickettsial, and viral diseases as well as macroparasites and emerging zoonotic diseases. More than two dozen diseases are covered including rabies, tularemia, baylisascariasis, salmonellosis, leprosy, Lyme disease, Rocky Mountain spotted fever, and swimmer's itch. Each chapter contains the history of the disease, symptoms in humans, medical treatment, transmission of pathogens to humans, the role of wildlife as vectors, and methods to minimize risk. The diseases people can contract from wild animals can be both threatening and fascinating, and the book includes interesting information to make it more enjoyable to read.

Making Mavericks-Frosty Hesson 2012-10-10 West Coast surfing legend Frosty Hesson shares his remarkable life story, the story of his extraordinary friendship with wunderkind Jay Moriarty, and his advice on how to be the best. When Richard "Frosty" Hesson was first approached by a young Jay Moriarty in 1990, the skinny kid with a sparkle in his eye only wanted one thing from the icon: his help in becoming a better surfer. Hesson, one of the first to conquer the huge waves off northern California known as Mavericks, recognized that the kid "had a vision." Jay quickly demonstrated a resolve that reminded Frosty of his younger self, pursuing his goal with a seriousness far beyond his years. His attitude and work ethic earned Frosty's respect and, eventually, his friendship. Making Mavericks is the inspiring story of their father-son bond and of the challenges that made each of them who they were--surf legends, and the subject of the upcoming film Chasing Mavericks. In Making Mavericks, Frosty talks about his turbulent youth spent under difficult circumstances, with parents who tried to find a positive way to handle a child with a passion for water and a disregard for his own safety. Throughout his life he developed principles to live by, principles that would become the core tenets of his teaching philosophy. Most significantly, Frosty talks about how one of his best students, Jay Moriarty, used his philosophy to become a surfing phenomenon, and whose life inspired the phrase, "Live like Jay." Affecting and poignant, Making Mavericks is a celebration of Hesson's determination

to live with joy and purpose, and his desire to help others do the same.

Komodo Dragons-James B. Murphy 2015-03-31 More than twenty years have passed since Walter Auffenberg's monumental The Behavioral Ecology of the Komodo Monitor. In the intervening years the populations of Komodo dragons—native only to a handful of islands in southeast Indonesia—have dwindled, sparking intensive conservation efforts. During the last two decades new information about these formidable predators has emerged, and the most important findings are clearly presented here. A memoir from Walter Auffenberg and his son Kurt is followed by the latest information on Komodo dragon biology, ecology, population distribution, and behavior. The second part of the book is dedicated to step-by-step management and conservation techniques, both for wild and captive dragons. This successful model is a useful template for the conservation of other endangered species as well, for, as Kurt and Walter Auffenberg note, "The species may well indeed survive in the wild for generations to come while countless other organisms are lost."

Women on the Line-Miriam Glucksmann aka Ruth Cavendish 2009-02-11 Women on the Line is a pioneering ethnographic classic of the world of work in a British motor components factory. Miriam Glucksmann (aka Ruth Cavendish), a well-known contributor to the study of gender, work and employment, is for the first time revealed as the author, along with the

identity of the company, product and factory. Recording the experience of migrant women from Ireland, the Caribbean, and the Indian subcontinent with the immediacy of a diary, this is a unique account from an observing participant of the daily routines of repetitive work, a strike led by women from below, and the temporalities of work, home, children and leisure. Glucksmann's vivid narrative of life on the assembly line is combined with an analysis of the intersections of gender, ethnicity and class that prefigures subsequent theoretical advances. This edition contains a new introduction situating the book in contemporary debates and developments and includes original photographs taken on the shop floor at the time.

The Real McCoy-Sheryl Leonard 2013 Stephanie Hays, RN, has been infatuated with the handsome, well-respected Dr. Peter Granville since her days in nursing school. And now she has the good fortune of working alongside the "Great Granville" in his hospital unit. There, she spends her days longing for precious scraps of his attention, even if they're won only by her legendary clumsiness. Dr. Luke Carter is Granville's senior resident--and a man who attracts women like ants to a picnic. But the only woman he wants is Stephanie, and she's blinded by her attraction to Granville. She fails to see him through Luke's eyes: as a cold, egocentric bully who'll do anything to get to the top. Determined to make Stephanie realize the unsettling truth about her idol, Luke conceives a plot to reveal Granville for who he really is. Is this the ticket to winning Stephanie's heart at last...or will it drive her straight into Granville's arms?

Return to Prosperity-Arthur B. Laffer 2010-02-09 "WE CAN'T TAX AND SPEND OUR WAY BACK TO THE GOOD TIMES." -- Arthur B. Laffer and Stephen Moore When Arthur B. Laffer spearheaded the theory of supply-side economics and became a member of President Reagan's Economic Policy Advisory Board, he took his place as an economic icon. More recently, he joined with Stephen Moore and Peter J. Tanous to write The End of Prosperity -- a clarion call delineating what is wrong with current political approaches to America's present economic challenges. Steve Forbes himself described The End of Prosperity as "brilliantly insightful," saying "READ IT - - AND ACT!" Now Arthur Laffer and Stephen Moore follow the rousing success of The End of Prosperity with a book even more vital to America and Americans, delivering a plan that shows how our country can regain its lost prosperity. With the economy flat on its back, unemployment at a twenty-five-year high, and the housing default crisis still worsening, is this even possible? But America can once again become the land of economic opportunity, and this brilliant new book tells us exactly how. While President George W. Bush and President Barack Obama may hail from different parties, their response to the crisis has been strikingly similar. The Bush-Obama plan is a failure that has produced nothing except a cascade of trillions of dollars of debt. Is the situation hopeless? No, say Arthur Laffer and Stephen Moore resoundingly, the situation is not hopeless. A return to prosperity is still entirely possible...if the correct strategies are followed. In The End of Prosperity, the authors primarily discussed how lower taxes are essential to economic growth. Now, in Return to Prosperity, they detail the other essential components: putting government at all levels on a low-fat diet; emphasizing debt reduction and retirement; and bringing back the investor class in America, where every American can "own a piece of the rock." In a time where most of the proposed solutions are fraught with peril, the argument provides a refreshing counterbalance. The Return to Prosperity is a prescription that gives America the fundamental tools it needs in order to set about recovery. This book is an urgently needed road map to renewed prosperity, and it is vital reading for anyone who worries that the current economy is faltering, with no clear plan articulated for recovery.

The Specters of Carlton County-Marc Miller 2005-06-01 To this day the ghosts of six, teenage, confederate soldiers - The Cowards' Patrol - roam the Ozark backwoods, forced by an evil cleric to continue taking the war to blue clad Yankees who dare trespass into the dark summer nights of isolated, Carlton County. When a young writer, Marc Miller, travels to the area to write their story, he finds he is unwelcome both as a writer and an outsider. He hears their mournful cries at night and sees their ghostly images in the windows and mirrors of the old Inn. He encounters them on horseback, swords at the ready, galloping together across a foggy, moonlit, Civil War graveyard. Are they apparitions searching for their final peace, or are they something more sinister? Miller is a skeptic but will that continue once he meets The Specters of Carlton County?

Carrie Fisher Coloring Book-Coloring Book Coloring Book for Adults 2017-01-22 Princess Leia Organa of Alderaan, later known as General Leia Organa, is a fictional character in the Star Wars franchise, portrayed in films by Carrie Fisher. Introduced in the original Star Wars film in 1977, Leia is princess of the planet Alderaan, a member of the Imperial Senate

and an agent of the Rebel Alliance. She thwarts the sinister Sith Lord Darth Vader and helps bring about the destruction of the Empire's cataclysmic weapon, the Death Star. In *The Empire Strikes Back* (1980), Leia commands a Rebel base and evades Vader as she falls in love with the smuggler Han Solo. In *Return of the Jedi* (1983), Leia leads the operation to rescue Han from the crime lord Jabba the Hutt, and is revealed to be Vader's daughter and the twin sister of Luke Skywalker. The prequel film *Revenge of the Sith* (2005) establishes that the twins' mother is Senator (and former queen) Padmé Amidala of Naboo, who dies after childbirth. Leia is adopted by Senator Bail and Queen Breha Organa of Alderaan. In *The Force Awakens*,

Leia is the founder and General of the Resistance against the First Order and has a son with Han named Ben, who now goes by the name Kylo Ren.
