Conquest of Mind-Eknath Easwaran 2010-08 This book is for people who want to understand how the mind works, and how to change it. If we want to grow to our fullest human potential, Easwaran says, we have to train the mind. If we follow his eight-point program, we can begin to choose the way we think and become the kind of person we want to be. Drawing on the teachings

of the Buddha, Easwaran's approach is universal and practical, putting our destiny in our own hands. And since it's hard to understand the hidden workings of the mind with the mind, Easwaran selects anecdotes to throw a spotlight on our thinking processes and to point the way to mastering them. For readers who have enjoyed Easwaran's Passage Meditation, Conquest of Mind gives another, intriguing perspective on his eight-point program.

Resilience & Melancholy-Robin James
2015-02-27 When most people think that "little girls should be seen and not heard," a noisy, riotous scream can be revolutionary. But that's

not the case anymore. (Cis/Het/White) Girls aren't supposed to be virginal, passive objects, but Poly-Styrene-like sirens who scream back in spectacularly noisy and transgressive ways as they "Lean In." Resilience is the new, neoliberal feminine ideal: real women overcome all the objectification and silencing that impeded their foremothers. Resilience discourse incites noisy damage, like screams, so that it can be recycled for a profit. It turns the crises posed by avant-garde noise, feminist critique, and black aesthetics into opportunities for strengthening the vitality of multi-racial white supremacist patriarchy (MRWaSP). Reading contemporary pop music - Lady Gaga, Beyonce, Calvin Harris - with and against political philosophers like Michel Foucault, feminists like Patricia Hill Collins, and media theorists like Steven Shaviro, /Resilience & Melancholy/ shows how resilience discourse manifests in both pop music and in feminist politics. In particular, it argues that resilient femininity is a post-feminist strategy for producing post-race white supremacy. Resilience discourse allows women to "Lean In" to MRWaSP

privilege because their overcoming and leaning-in actively produce blackness as exception, as pathology, as death. The book also considers alternatives to resilience found in the work of Beyonce, Rihanna, and Atari Teenage Riot. Updating Freud, James calls these pathological, diseased iterations of resilience “melancholy.” Melancholy makes resilience unprofitable, that is, incapable of generating enough surplus value to keep MRWaSP capitalism healthy. Investing in the things that resilience discourse renders exceptional, melancholic siren songs like Rihanna’s “Diamonds” steer us off course, away from resilient “life” and into the death.

Linux iptables Pocket Reference-Gregor N. Purdy 2004-08-25 Firewalls, Network Address Translation (NAT), network logging and accounting are all provided by Linux's Netfilter system, also known by the name of the command used to administer it, iptables. The iptables interface is the most sophisticated ever offered onLinux and makes Linux an extremely flexible

system for any kind of network filtering you might do. Large sets of filtering rules can be grouped in ways that makes it easy to test them and turn them on and off. Do you watch for all types of ICMP traffic--some of them quite dangerous? Can you take advantage of stateful filtering to simplify the management of TCP connections? Would you like to track how much traffic of various types you get? This pocket reference will help you at those critical moments when someone asks you to open or close a port in a hurry, either to enable some important traffic or to block an attack. The book will keep the subtle syntax straight and help you remember all the values you have to enter in order to be as secure as possible. The book has an introductory section that describes applications, followed by a reference/encyclopaedic section with all the matches and targets arranged alphabetically.

Profiting with Iron Condor Options-Michael Benklifa 2011-06-20 In a straightforward approach, Hanania Benklifa provides readers the

practical knowledge needed to trade options conservatively in Profiting with Iron Condor Options: Strategies from the Frontline for Trading in Up or Down Markets. The objectives are simple: make 2%-4% a month staying in the market as little as possible. Market experts use option condors to consistently earn monthly returns while trading conservatively and staying in the market as little as possible. Benklifa--who manages \$10+ million in condor trades each month--shows you exactly how to run these trades and earn these returns, delivering all the details you need to master every nuance of this remarkable strategy. Benklifa shares option condors examples using market realities, not oversimplified abstractions. You'll learn how to handle real-life market dynamics that can dramatically impact results, including rising and falling volatility, changing bid-ask spreads, and distorted call parity. You'll learn how to profit in the sideways markets where condor options are most widely used--and also in extreme-trending markets that offer their own surprising opportunities. Traders who focus on a specific

type of trade have a history of outperforming stock pickers and directional investors. This book will give you that deep and usable level of knowledge about one of today's most well-proven strategies: option condors.

Situating Portfolios-Kathleen Yancey 1997-02
Situating Portfolios is both reflective and forward-looking, practice-oriented but well-grounded in theory. Kathleen Yancey and Irwin Weiser bring together thirty-one writing teachers from diverse levels of instruction, institutional settings, and regions to create an inviting volume on current practice in portfolio writing assessment. The contributors here reflect on the explosion in portfolio practice over the last decade, why it happened, what comes next; discuss portfolios in hypertext, the web, and other electronic spaces; report on current and new contexts, from emergent literacy to faculty

development, in which portfolios now appear; and consider emerging trends and issues that are involving portfolios in teacher assessment, faculty development, and graduate student experience. An energetic volume, *Situating Portfolios* gathers a wide range of experience and thinking into one stimulating discussion. It's a book that will be of interest to writing teachers and teacher educators at all levels.
