Dangerous Language – Esperanto and the Decline of Stalinism-Ulrich Lins 2017-02-09
This is Volume 2 of Dangerous Language. This book examines the rise of the international language Esperanto, launched in 1887 as a proposed a solution to national conflicts and a path to a more tolerant world. The chapters in this volume examine the position of Esperanto in Eastern Europe during the Cold War; in particular it explores Stalin's final years and the gradual re-emergence of the Esperanto movement. At first, its revival was limited to the satellite countries, especially Bulgaria and Poland, but, with Stalinism's gradual retreat, Esperanto organizations reappeared in most East European countries and eventually in the Soviet Union itself. The progress was uneven, and its details reveal the stresses and strains that became apparent as the solidarity of the Soviet bloc declined. This book will appeal to a wide readership, including linguists, historians, political scientists and others interested in the history of the twentieth century from the unusual

perspective of language. This volume is complemented by the sister volume Dangerous Language – Esperanto under Hitler and Stalin which offers a concentration on the creation and early emergence of Esperanto as an international language.

Race Tech's Motorcycle Suspension Bible-Paul Thede 2010-06-19 Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Advanced Custom Motorcycle Wiring-Jeff Zielinski 2013 The one job that even the best mechanics avoid is wiring. Those worries are now over with help from the revised edition of "Advanced Custom Motorcycle Wiring." This book uses Chapter One to cover the basics of DC electricity and Chapter Two to explain batteries, starters, and alternators. It goes on to cover the schematics and factory harnesses for both early and late-model Harley-Davidsons. Jeff Zielinski, owner of NAMZ Custom Cycle Products and wiring harness and component designer, is the author of this revised Motorcycle Wiring book. In addition to a discussion of factory Harley-Davidson wiring harnesses, Jeff describes at length the various harness options available to a person building a custom bike. Is it better to build a harness from scratch, or install a ready-made harness kit? What's the easiest way to route all those wires through the top frame tube and the handle bars? These questions and many more are answered in this book. Inside you will find over 350 color photos and wiring illustrations spread across 144 pages. Everything from basic chopper wiring diagrams and schematics to complex factory schematics - as well as a complete, start-to-finish harness install sequence.

Classic Japanese Motorcycle Guide-Rod Ker 2007-04-30 This is the definitive guide to identifying, buying and riding Japanese bikes from the 1960s to the early 1990s, concentrating on mainstream, affordable models from the 'big four': Honda, Kawasaki, Suzuki and Yamaha. Fully illustrated in color throughout, the book provides a brief history of the Japanese motorcycle industry, its post-war rise and displacement of traditional British, European and American marques. Specific bikes are then grouped and discussed in detail, providing an essential reference for buyers and enthusiasts alike.

Classic Honda Motorcycles-Bill Silver 2012 Classic Honda Motorcycles presents an overview of Honda motorcycles produced from 1958 through 1990, including iconic models such as the CB77 Super Hawk, CB92 Benly, Dream, CB750 and many others. Enthusiasts will find a bounty of useful and interesting information about which bikes are likely to suit an individual

rider's needs, which models are most collectible and how to find parts for rare Honda motorcycles.

Zen and the Art of Motorcycle Maintenance-Robert M. Pirsig 2009-04-21 Acclaimed as one of the most exciting books in the history of American letters, this modern epic became an instant bestseller upon publication in 1974, transforming a generation and continuing to inspire millions. This 25th Anniversary Quill Edition features a new introduction by the author; important typographical changes; and a Reader's Guide that includes discussion topics, an interview with the author, and letters and documents detailing how this extraordinary book came to be. A narration of a summer motorcycle trip undertaken by a father and his son, the book becomes a personal and philosophical odyssey into fundamental questions of how to live. The narrator's relationship with his son leads to a powerful self-reckoning; the craft of motorcycle maintenance leads to an austere beautiful process for reconciling science, religion, and humanism. Resonant with the confusions of existence, Zen and the Art of Motorcycle Maintenance is a touching and transcendent book of life.

Summary: The Plant Paradox: The Hidden Dangers in "healthy" Foods That Cause Disease and Weight Gain-Fanton Publishers 2018-10-23 The Ultimate Summary Of Dr. Gundry's Bestselling Book "The Plant Paradox: The Hidden Dangers in "Healthy" Foods That Cause Disease and Weight Gain". Don't eat anything you call healthy before reading this summary of the Plant Paradox by Dr. Gundry. Dr. Gundry's bestselling book unearthed some things about diet and disease that very few nutritionists and other medical professionals have the courage to talk about i.e. the fact that some of the foods we are told to take to be healthy are the same ones that are messing us up! The 416-page book has lots of valuable information that everyone who is eager to know the link between food and disease should read. But let's be honest, reading a staggering 416 pages isn't everyone's cup of coffee in this day and age when we have so much to do, especially in a book that's as

comprehensive as Dr. Gundry's. Don't worry though; you can read a summary of it to know the main points, which the author talks about. I am not in any way suggesting that you shouldn't read the original book; you should if you want to find all the details of Dr. Gundry's findings so you can make an informed decision as far as healthy eating is concerned. Whether you want to read the summary alone or as a reading companion when reading the original book, you will find this Plant paradox summary very useful in ensuring you understand everything you are learning. More precisely, this book covers the following: A quick overview of the book The foods you should eat i.e. the NO list and the YES list How the approach will help you lose weight The principles of the plant paradox diet and how to follow it Sample meal plan Delicious recipes, which you should be preparing And much, much more! I believe this book will open your eyes to the way food we've always considered healthy is hurting is so that you can do something about it before you can cause some untold damage. Critter Village: This Can't Be Happening (All Ages)-Critter Village Comics 2018-12-10

Somewhere deep in the woods lies the small community of Critter Village, a domed habitat for animals who have successfully evicted their human neighbors and built their own society. In 'This Can't Be Happening', Carson's buddies ditch social contact in favor of the wildly popular Pokémon Go! phone app. Lonely and bored, Carson uncovers a sinister connection between the app and Roger's Grocery Store, and enlists Nutso for help.

Where BSAs Dare-Norman Vanhouse 2015-10

In 1952, BSA wanted to publicise their new 500cc Star Twin. So what better way than to set the bike a nearly impossible task? They took three standard bikes and, under Auto-Cycle Union observation, rode them to Austria, and entered the 1952 International Six Days Trial. After winning three golds the same bikes then rode to Norway, where they undertook a speed test knocking up over 80mph whilst on low gearing - and all this in just over three weeks and mostly in unrelenting rain! This dramatic and compelling story of the 'golden age' of British

bikes is told by Norman Vanhouse, one of the three riders involved.

Preparing the Yamaha Yz and It for

Competition-Jim Gianatsis 1979-01-01 First published in 1979 as the "Moto-X Fox Guide to Preparing the Yamaha YZ and IT for Competition," this 64-page book was written and photographed by famed 1970's Cycle News editor, racer and motocross journalist Jim "Jimmy the Greek" Gianatsis. It covers the development and racing history of the Yamaha 2-stroke and 4-stroke motocross and enduro bikes from the DT models raced by the Don Jones family in the early 1970s, through to the exotic YZ, OW and TT-500 machines raced by Hakan Andersson, Pierre Karsmakers and Bob "Hurricane" Hannah up to 1979. Included is race bike preparation information from famed Yamaha factory rider Bob Hannah, his mechanic Keith McCarty, the top privateer Moto-X Fox Racing Team, as well as privateer mechanic Bevo Forte. There is also a section on IT model enduro bike preparation by Yamaha motocross and ISDT rider Chris Carter. Included is "Riding with the Hurricane" an eight chapter racing instruction guide with photos that Jim produced with Bob Hannah that was originally printed in Cycle News as a weekly series in 1978. Preparing the Yamaha YZ and IT for Competition is a classic dirt bike technical, tuning and riding manual that has been out of print and unavailable for 30 years. It serves as very interesting reading and a great historical reference guide for dirt bike fans both young and old. Many of the bike preparation and riding tips are still relevant today. A must have for any dirt bike enthusiast or collector.

A Sound of Thunder-R. G. Waldron 2009-10 This collection of stories takes a brief look at the life and times of a young man growing up on the San Francisco peninsula during the early sixties. The narrations provide glimpses of a thirty-five year journey through the world of drugs, alcohol, motorcycles, and the road to recovery. The individual accounts shadow his life's path as he does his best to find his way back home.

Jupiter's Travels-Ted Simon 2007-01-25 Jupiter's Travels -Ted Simon's astonishing 4 year motorbike journey around the world The book that inspired Ewan McGregor's Long Way Round In the late 1970s Ted Simon set off on a Triumph and rode 63,000 miles over four years through fifty-four countries in a journey that took him around the world. Through breakdowns, prison, war, revolutions, disasters and a Californian commune, he travelled into the depths of fear and reached the heights of euphoria. He met astonishing people and was treated as a spy, a welcome stranger and even a god. For Simon the trip became a journey into his own soul, and for many others - including bikers Charley Boorman and Ewan McGreggor - it provides an inspiration they will never forget. This classic text, which has informed a whole genre of travel writing in the thirty years since it was first published, will never be bettered for sheer adventure, passion, humour and honesty. Brought up in England by a German mother and a Romanian father, Ted Simon found himself impelled by an insatiable desire to explore the world. It led him to abandon an early scientific career in favour of journalism, and he has worked for several newspapers and magazines on Fleet Street and elsewhere. Ted Simon is also the author of Riding Home and The Gypsy in Me.

Balancing the School Calendar-Carolyn Kneese 2009 Today, educators are looking for ways to utilize classroom time more effectively. Many thoughtful and forward-looking educators have reorganized the school calendar from the traditional nine-month model to one which is more balanced, and they have experienced the

effects of calendar modification in the classroom, school, district, and community. Balancing the School Calendar is a compilation of perspectives and research reports from those who have experienced the urgent necessity of reorganizing time to effectuate better learning situations for students. Chapter authors have implemented, studied, or contemplated school calendar change and the results of the change.

You Deserve a Drink-Mamrie Hart 2015-05-26 A New York Times bestselling, riotously funny collection of boozy misadventures from the creator of the YouTube series, "You Deserve a Drink." Mamrie Hart is a drinking star with a Youtube problem. With over a million subscribers to her cult-hit video series "You Deserve a Drink," Hart has been entertaining viewers with a combination of tasty libations and raunchy puns since 2011. Hart also co-wrote/co-starred in Dirty Thirty and Camp Takota with Grace Helbig and Hannah Hart. Finally, Hart has compiled her best drinking stories—and worst hangovers—into one hilarious volume. From the spring break where she and her girlfriends avoided tan lines by staying at an all-male gay nudist resort, to the bachelorette party where she accidentally hired a sixty-year-old meth head to teach the group pole dancing (not to mention the time she lit herself on fire during a Flaming Lips concert), Hart accompanies each story with an original cocktail recipe, ensuring that You Deserve a Drink is as educational as it is entertaining. With cameos from familiar friends from the YouTube scene and a foreword by Grace Helbig, this glimpse into Hart's life brings warmth and humor to the woman fans know and love. And for readers who haven't met Mamrie yet—take a warm-up shot and break out the cocktail shaker: you're going to need a drink. "Hart is a pull-no-punches comedian with a talent for self-deprecation in the guise of self-aggrandizement, a winning formula."—The New York Times

Even More Parts-Tedd Arnold 2007 A young boy is worried about what will happen to his body when he hears such expressions as "I'm tongue-tied," "don't give me any of your lip," and "I put my foot in my mouth."

Anatomy of the Chopper-Doug Mitchel 2006-08-01 True custom choppers are unlike anything else on the road. Breaktaking, awe-inspiring and sometimes downright frightening, they are often spectacular works of rolling art that showcase the unique character and talents of their builders and riders. In Anatomy of the Chopper, Doug Mitchel focuses his expert camera lens on some of the most radical bikes in existence and provides an up-close look at what makes these machines so jaw dropping.

Long Way Round-Ewan McGregor 2005-11-01 The popular actors recount their three-month, 20,000-mile motorbike journey from London to New York through three continents and some of the harshest terrain on Earth.

The Path of the Pole-Charles H. Hapgood 1999 Hapgood's tour de force is back in print! This riveting account of how earth's poles have flipped positions many times is the culmination of Hapgood's extensive research of Antarctica, ancient maps and the geological record. This amazing book discusses the various pole shifts in earth's history -- occurring when earth's crust slips in the inner core -- and gives evidence for each one. It also predicts future pole shifts: a planetary alignment will cause the next one on 5 May 2000! Packed with illustrations, this book is the reference other books on the subject cite over and over again. With millennium madness in full swing, this is just the book to generate even more excitement at the unknown possibilities.

Custom Rides-Rob Davies 2018-05 A wise man once said that cars move the body, but motorcycles move the soul. If you love motorcycles, you will understand the thrill of weaving in the fluid motion that only two wheels and a responsive engine can give. Of being on a fabulous road, with the warmth of the sun on your body, and the wind gently tugging at your clothes. Now imagine that you have built the bike of your dreams ... can you see it, hear it, feel it? Custom Rides is not only full of amazing photographs of gorgeous bikes, it also provides an insight into the mind of some of the world's finest bike designers and builders, and the tools and equipment they use to get such special results. So settle down and enjoy the ride, as you feast your eyes and eat your heart out for all the

beautiful bikes featured in this book.

Mathematical Methods for Physics and Engineering-Mattias Blennow 2018-01-03 Suitable for advanced undergraduate and graduate students, this new textbook contains an introduction to the mathematical concepts used in physics and engineering. The entire book is unique in that it draws upon applications from physics, rather than mathematical examples, to ensure students are fully equipped with the tools they need. This approach prepares the reader for advanced topics, such as quantum mechanics and general relativity, while offering examples, problems, and insights into classical physics. The book is also distinctive in the coverage it devotes to modelling, and to oft-neglected topics such as Green's functions.

Pricksongs and Descants-Robert Coover 2000-01-05 Presents a collection of short stories based on traditional fairy tales that expose the futility of idealism.

Electric Power Systems-Ned Mohan 2012-01-18 Author Ned Mohan has been a leader in EES education and research for decades. His three-book series on Power Electronics focuses on three essential topics in the power sequence based on applications relevant to this age of sustainable energy such as wind turbines and hybrid electric vehicles. The three topics include power electronics, power systems and electric machines. Key features in the first Edition build on Mohan's successful MNPERE texts; his systems approach which puts dry technical detail in the context of applications; and substantial pedagogical support including PPT's, video clips, animations, clicker questions and a lab manual. It follows a top-down systems-level approach to power electronics to highlight interrelationships between these sub-fields. It's intended to cover fundamental and practical design. This book also follows a building-block approach to power electronics that allows an in-depth discussion of several important topics that are usually left. Topics are carefully sequenced to maintain continuity and interest.

Ducati Motorcycles-Alan Cathcart 1983

Anger Mode-Stefan Tegenfalk 2011 Two cars collide head-to-head on a country road with little passing traffic. The collision is violent. 10-year-old Cecilia is catapulted through the windscreen and killed. Five years later, criminal detective Walter Gröhn gets a perplexing case on his desk - a dead taxi driver and a killer who has no idea why he has committed the crime. The first murder is followed by more killings, all equally as brutal and apparently inexplicable. Together with his talented assistant, Jonna de Brugge, Gröhn uncovers secrets that lead to the core of the judicial system itself...

The Ride-Paul D'Orléans 2013 The motorcycle is back! Similar to the fresh contemporary scene that has established itself around bicycles in the last few years, the motorcycle is currently undergoing an aesthetic rebirth. A young subculture worldwide is discovering the motorcycle as an expression of its personality and creativity. The Ride explores motorcycle riding as it is meant to be: as a means of getting around with attitude, as an extension of one's own body, as an expression of personal freedom, but also as a significant challenge to technical expertise, craftsmanship, physics, discipline, and driving skill. In the motorcycle scene of 1960s

Britain, it was frowned upon to drive a motorcycle as it was produced in a factory. Following in this historical tradition, The Ride focuses on those who are creating customized motorcycles that come as close to one's own vision of how pure riding should be as possible. For example, the creative young people who are buying old, wrecked bikes on eBay, removing everything but the motor and frame, and then rebuilding them in ways that are as radical and subversively creative as they are knowledgeable and respectful of tradition. The archetypes of the new motorcycles created in this way--classic board racers, bobbers, café racers, and choppers--may very well be 30-50 or even 80 years old, but what is made out of them is new, not retro. Decked out with state-of-the-art disk brakes, LED lights, gears, and drive components, these machines are more agile, faster, more radical, and therefore more fun than anything produced in the past. The Ride features transformations such as a boring plastic motorcycle made in Japan in the 1990s turned into a slick café racer with an Italian feel, a soulless neo-baroque machine turned into an in-your-face scrambler, or an old find from grandpa's barn turned into a absolutely comfort-free hardtail with the coolest of sounds. The book also presents small, local custom motorcycle workshops from around the globe that have established themselves with sought-after products that inspire other builders worldwide. It features extensive profiles of pioneers including Walt Siegl, Wrenchmonkees, DP Customs, Cole Foster, Deus, Shinya Kimura, Ian Barry, and Uwe Ehinger and their very different ideas of how a motorcycle should be. The unique bikes created in their garages--sometimes made-to-order, sometimes in a limited series--are often technically superior, better thought-out, and simply more radical than those produced by larger manufacturers who need to appeal to a broader audience. The spirit of this young motorcycle scene is reminiscent of that of current bike frame builders or even today's new food subculture. It's about making, transforming, or designing something with your own hands. In this case, something that will get a person from A to B, that makes noise, smells, vibrates, and comes to life. What could be more exciting, more analog, and more satisfying?
