A Guide to Living Standards Measurement Study Surveys and Their Data Sets-Margaret E. Grosh 1995-01-01 World Bank Discussion Paper No. 302. Presents an alternative way of financing development in Sub-Saharan Africa in order to address the shortcomings of past investment lending. This study discusses sector investment programs (SIPs) as an alternative way of financing development in Sub-Saharan Africa in order to address the shortcomings of past investment lending in the region. The report examines the nature and features of SIPs by drawing on the limited experience with such operations in a number of countries to date, including Bangladesh, Mozambique, Pakistan, Tanzania, and Zambia. A SIP is distinguished by its comprehensive sector coverage, by close coordination among all parties, including stakholders and donors, and by the requirement that it be formulated under local ownership and management

Diary of a Zombie-Sergi Llauger 2014-08-20 "The day I died was the day when I nearly lost the little humanity that was left inside me. The eternal promise of leaving as a peaceful spirit was never fulfilled; instead, I became a wandering soul, rooted to the entrails of this wasteland. You might think that smiling in the face of death should be something glorious, but there's nothing glorious about this. There's only a deep and sinister emptiness inside. Destiny made me walk among demons I didn't need to be scared of. It allowed me to stare at the sun without looking away from dawn to dusk. It placed the burden of this world on my back and also forced me to remember the meaning of love...and of giving human beings a second chance. Was there ever a reason for so many broken laws? Who knows...Let me tell you about a fascinating journey and faraway lands, about unswerving loyalty and unimaginable creatures. My name is Erico Lombardo and I am doomed to be aware of myself. Maybe, after my death, I still had one last thing to do..." "Diary of a Zombie" transports us to a desolate world, a planet wiped out by a massive pandemic where human beings have almost become extinct. But what makes this story different from the rest is the fact that it is told from a very unusual point of view: that of a zombie who, for unknown reasons, keeps his human consciousness and free will after being transformed. This is a unique case. After a few chapters in which the character is introduced, we will witness a story of redemption, full of human values, that is centered around a peculiar friendship. Erico's cold, cynical and unsociable behavior will gradually change as he meets a lonely and mysterious 8-year-old girl on whom humankind's scarce chances of survival depend. During the whole of his epic adventure, Erico will be linked to his most human side again, as he recovers memories and feelings he had not experienced since the times when warm blood still coursed through his veins. "Diary of a Zombie", mostly set in a post-apocalyptic Barcelona, presents a pleasant story which will bring the reader both tears and laughter. It is a breath of fresh air that reinvents a genre which apparently had nothing new to offer.

Matching Theory-László Lovász 2009 This book surveys matching theory, with an emphasis on connections with other areas of mathematics and on the role matching theory has played, and continues to play, in the development of some of these areas. Besides basic results on the existence of matchings and on the matching structure of graphs, the impact of matching theory is discussed by providing crucial special cases and nontrivial examples on matroid theory, algorithms, and polyhedral combinatorics. The new Appendix outlines how the theory and applications of matching theory have continued to develop since the book was first published in 1986, by launching (among other things) the Markov Chain Monte Carlo method.

Valuation for Arbitration-Mark Kantor 2008-01-01 This book provides a clear understanding of the nuts and bolts of valuation approaches for business investments, including market, income and asset-based methods. It reviews tools that arbitrators may employ to reach their final compensation assessment on a principled basis. The bookand[is] many practical recommendations explore the decision making processes entailed in three central aspects of the arbitratorand[is] role: and[is] advance planning to enhance understanding of expert valuation evidence; and[is] identification of and[is]apples-to-orangesand[is] miscomparisons; and and[is] recognition of the true comparability between the business at issue and other examples offered in the expert evidence. The presentation focuses not only on the legal standards applicable to the valuation (full or adequate compensation, reparations, restitution, actual loss, fair market value, fair or reasonably equivalent value, lost profits, etc.), but also on the informed judgment and reasonableness that must enter into the process of weighing the facts of each case and determining its aggregate significance. The book considers common valuation methods like discounted cash flows, adjusted present values, capitalized cash flows, adjusted book values and comparable sales and transactions. Additionally, it addresses means for arbitrators to assess expert valuation evidence in complex business investment disputes. andquot;Best book 2008 of
