The author takes a balanced, non-judgmental approach to introduce a range of ideological and political perspectives on the operation of political, economic, and demographic forces in city planning. Unlike other books on the subject, this one is strong in its coverage of economics, law, finance, and urban governance. It examines the underlying forces of growth and change and discusses frankly who benefits and loses by particular decisions. A four-part organization covers the background and development of contemporary planning; the structure and practice of contemporary planning; fields of planning; and national planning in the United States and other nations, and planning theory. Medieval Literature and Civilization-
2014-01-13
These original contributions to the study of medieval literature and civilization in Britain and Scandinavia are published as a memorial to Norman Garmonsway, Chair of English at King's College, University of London, who died in 1967. The aim has been to offer to the public a book of essays which have a direct bearing upon his central academic interests and which is thus structured, in some measure, after his mind. He saw the study of the language and literature (together with the history and archaeology) of early Britain and Scandinavia as forming a single coherent discipline and this conception of unity in diversity can be glimpsed both in the range of matters which he chose to write upon and in many of his individual pieces. These essays will also appeal to the interested non-specialist, reflecting the fact that Norman Garmonsway was, despite his erudition, the very antithesis of the remote and secluded scholar.
