The Venture of Islam, Volume 1-Marshall G.

S. Hodgson 2009-05-15 The Venture of Islam has been honored as a magisterial work of the mind since its publication in early 1975. In this three-volume study, illustrated with charts and maps, Hodgson traces and interprets the historical development of Islamic civilization from before the birth of Muhammad to the middle of the twentieth century. This work grew out of the famous course on Islamic civilization that Hodgson created and taught for many years at the University of Chicago. "This is a nonpareil

work, not only because of its command of its subject but also because it demonstrates how, ideally, history should be written."—The New Yorker Volume 1, The Classical Age of Islam, analyzes the world before Islam, Muhammad's challenge, and the early Muslim state between 625 and 692. Hodgson then discusses the classical civilization of the High Caliphate. The volume also contains a general introduction to the complete work and a foreword by Reuben Smith, who, as Hodgson's colleague and friend, finished the Venture of Islam after the author's death and saw it through to publication.

A Short History of the Saracens-Syed Ameer Ali 1900

A History of Christian-Muslim Relations-

Hugh Goddard 2000 The relationship between the Christian and Muslim worlds has been a long and tortuous one. Over the course of the centuries the balance of power has swung in pendulum fashion at times the initiative seems to have lain with the Muslim community, with the Christian world simply being compelled to react to developments outside itself, while at other points the opposite has been true and Muslims have found themselves having to respond to Christian challenges in different forms. Today Christians and Muslims comprise the world's two largest religious communities. Although they can coexist fairly peacefully, at times they still engage in violent confrontation, such as in the recent conflicts in Bosnia and the Sudan. This book investigates the history of the relationships between Christians and Muslims over the centuries, from their initial encounters in the medieval period, when the Muslims were the dominant group, through to the modern period, when the balance of power seems to have been reversed. This much-needed overview of the Christian-Muslim encounter places the emphasis

on the context within which perceptions and attitudes were worked out and provides a depth of historical insight to the complexities of current Christian-Muslim interactions on different continents."

Islam and Political Development in Turkey-

Arabs in History-Bernard Lewis 2002-03-14

'Whoever lives in our country, speaks our language, is brought up in our culture and takes pride in our glory is one of us.' Thus ran a declaration of modern leaders of Arab states. But what exactly is an Arab, and what has been their place in the course of human history? In this

well-established classic, Professor Lewis examines the key issues of Arab development - their identity, the national revival which cemented the creation of the Islamic state, and the social and economic pressures that destroyed the Arab kingdom and created the Islamic empire. He analyses the forces which contributed to that empire's eventual decline, and the effects of growing Western influence. Today, with the Arab world facing profound social and political challenges, it constitutes an essential introduction to the Arabs and their history.

Muhammad-Karen Armstrong 2013-08-13 The Man Who Inspired the World's Fastest-Growing Religion Muhammad presents a fascinating portrait of the founder of a religion that continues to change the course of world history. Muhammad's story is more relevant than ever

The Study of History-Goldwin Smith 1861

History of Islamic Origins of Western Education-Mehdi Nakosteen 1964 Nakosteen has drawn from German, Persian, Arabic, English, and French sources as well as his own understanding of the Eastern and Western cultures gained from living and studying in both. As a result, the reader can form an over-all picture of the contributions of Islamic scholarship to the Western world, particularly through the development of European universities during the twelfth and thirteenth centuries. Professor Nakosteen's major research examines the following basic questions: Through

what channels and to what extent did classical scholarship -- Greco-Hellenistic, Syriac-Alexandrian, Zoroastrian, and Indian -- reach the Muslims? What cumulative and creative additions, modifications, or adaptations of this classical learning took place in the hands of Muslim scholars and schoolmen from the eighth through the eleventh centuries? Through what channels and to what extent did the results of classical scholarship so preserved, enriched, and enlarged by the Muslims reach the Western world, mainly during the twelfth and thirteenth centuries? Finally, what were some of the basic contributions of the transmission of Muslim learning to the expansion and reconstruction of the West European curriculum, particularly on levels of higher and professional education?

The Battle for God-Karen Armstrong
2011-08-10 In the late twentieth century,

fundamentalism has emerged as one of the most powerful forces at work in the world, contesting the dominance of modern secular values and threatening peace and harmony around the globe. Yet it remains incomprehensible to a large number of people. In *The Battle for God*, Karen Armstrong brilliantly and sympathetically shows us how and why fundamentalist groups came into existence and what they yearn to accomplish. We see the West in the sixteenth century beginning to create an entirely new kind of civilization, which brought in its wake change in every aspect of life -- often painful and violent, even if liberating. Armstrong argues that one of the things that changed most was religion. People could no longer think about or experience the divine in the same way; they had to develop new forms of faith to fit their new circumstances. Armstrong characterizes fundamentalism as one of these new ways of being religious that have emerged in every major faith tradition. Focusing on Protestant fundamentalism in the United States, Jewish fundamentalism in Israel, and Muslim fundamentalism in Egypt and Iran, she

examines the ways in which these movements, while not monolithic, have each sprung from a dread of modernity -- often in response to assault (sometimes unwitting, sometimes intentional) by the mainstream society. Armstrong sees fundamentalist groups as complex, innovative, and modern -- rather than as throwbacks to the past -- but contends that they have failed in religious terms. Maintaining that fundamentalism often exists in symbiotic relationship with an

aggressive modernity, each impelling the other on to greater excess, she suggests compassion as a way to defuse what is now an intensifying conflict. BONUS: This edition contains an excerpt from Karen Armstrong's *Twelve Steps to a Compassionate Life*.
